

1st Porous Materials for a Sustainable Future: A Mediterranean and Middle East Roadmap

08 – 11 November 2026 • Ayia Napa, Cyprus

Conference Overview

The conference aims to bring together scientists working on porous materials, encompassing topics such as metal–organic frameworks, covalent organic frameworks, and zeolites, as well as porous chalcogenides, carbons, polymers, and organic systems. It provides an excellent platform for scientists at all career stages to stay informed about the latest advances in porous materials and their applications, share and discuss recent findings, and actively engage with the international research community.

Invited Speakers

Prof. Mercuri G. Kanatzidis
Charles E. and Emma H. Morrison
Professor of Chemistry,
Northwestern University

Prof. Omar Farha
Charles E. and Emma H. Morrison
Professor of Chemistry,
Northwestern University

Prof. Veronique Van Speybroeck
Head of the Center for Molecular
Modeling (CMM),
Ghent University

Prof. Yong Cui
Chair
Professor of Chemistry
Shanghai Jiao Tong University

Conference Chair

Prof. Anastasios Tasiopoulos
University of Cyprus
Nicosia, Cyprus
Tel: +357 22892765
Email: atasio@ucy.ac.cy
